

Quantity Surveying Services for the Bank branch development programme from basic freshen up to major flagship refurbishment. Majority of the works carried out whilst branches fully operational.

Appleyard & Trew are also periodically appointed to carry out a strategic review and update of the processes and documents used on the framework. In 2008 Appleyard & Trew were commissioned to advise and procure a new framework (contract) for the branch network development which included creating and tendering a new suite of framework documents and contracts. This has shown significant benefits during 2009 and 2010.
